

CD-CLIP

concentrated efficiency

the **ideal** solution
for attaching **all type of CD**

Manufactured in Polyurethane, CD-Clip is **completely transparent**, your message remains clearly visible under the clip. CD-Clip is practically invisible and does not spoil graphics.

Both strong and supple, the material of the CD-Clip resists crushing perfectly and adjusts to the flexibility of the media to which it is attached. The Soft Touch material is also highly tactile.

The shape of the CD-Clip is **designed to protect CD data** against scratches, as the disk is not in direct contact with the media. The fixing of the disk to the CD-Clip is equally well though through, the elasticity and power of **the adhesive guarantee optimum grip** of the CD.

Attaching is also very easy, just remove the CD-Clip from the pack and place it on the media. The adhesive used is acrylic based; it is powerful and **highly efficient on the majority of materials** (cardboards, papers, plastics, metals, etc.)

CD-CLIP

compared to other solutions

	 CD SPIDER	 CD HUB	 CD-CLIP
DESIGN	Oversized, unaesthetic, especially when CD is removed	Compact but not transparent, only in black or white	Compact and transparent. Pleasant tactile material
QUALITY	Excessive rigidity, risks of incompatibility with flexible media. Very good CD hold	CD hold random, the material distorts (foam)	Very good adaptation on all media, same flexibility (elasticity of material). Excellent CD hold
ADHESION TO MEDIA	The entire surface is not stuck to the media, risks of separation, especially on the flexible media	Very good: entire surface is stuck to the media	Very good: entire surface is stuck to the media Excellent, adhesion area is 40% higher than for CD hubs, powerful adhesive
DATA PROTECTION	Very good: the disc is raised, the data is protected	The data is not protected, the disk is in direct contact with the media	Very good: the disk is raised, it is not in contact with the media, the data is protected

features

Packaging

- Pack of 32
- 125 packs per carton
- 4000 units per carton
- Carton weight: 5 Kg
- Carton dimensions: Length 34 cm, width 18 cm, height 17 cm

Other colours possible

BLACK, WHITE, BLUE, TRANSPARENT
